TGA[®] Durable Interior Film

WS series

基于木头的真实触感与观感，TGA[®] WS 系列将木加工经典工艺——打磨涂装处理，应用于木纹膜制作，藉由创新工艺手法突破原有技术界限，让膜材收获天然材料独有的凹凸立体感，以逼真细腻的质感贯穿层次之间，在不同空间中，自由表达浑然天成的生命力。

Based on the real tactile and appearance of wood, the series of TGA[®] WS applies the classic technique of wood processing, namely polish and coating treatment to the production of wood grain film. What's more, it breaks through the original technical boundaries via innovative techniques to equip the film with unique concave-convex stereo materials. Therefore, the layers are penetrated by realistic and exquisite texture, so that the natural vitality can be freely expressed in different spaces.
