

HITACHI UX MODEL

Hitachi Continuous Ink Jet Printer for Industrial Marking

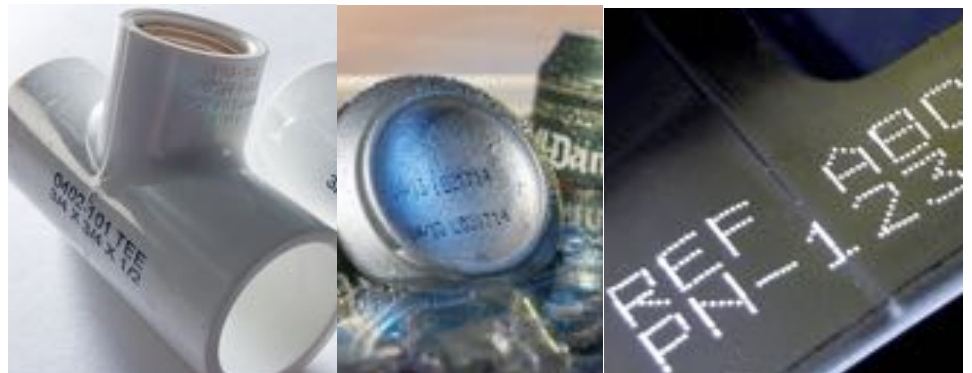

Next-generation leadership performance

Maintainability and environmental performance have dramatically improved.

A human-friendly and environmentally-friendly IJ printer has debuted.

Ink Jet Printer
UX Series

Hitachi UX Model

Cartridge-type Ink bottle and Makeup bottle

- Reduce customer's burden by easy cartridge replacement with no ink splashes nor ink drops.
- Easy to dispose the empty cartridge because no liquid is remained after ink/makeup is finished up.

Reduced Makeup consumption

- The amount of makeup volatilization during operation is reduced by the new technology of "Makeup fluid consumption reduction system".
- The amount of makeup volatilization is reduced to 50% on Premium model UX-E, 30% on Standard model UX-D and Basic model UX-B.

Multiple line printing: 6-line printing

Multiple line printing: 6-line printing is now available.

- Easy replacement of ink filter by development ink system.
- Strong printhead.
