## Lasers and Ink jets

Lasers and Ink jets are used to apply small character codes (lot codes and batch numbers, dates etc) and other alphanumeric information to packaged goods such as foodstuffs and beverages, personal and household care products and pharmaceuticals. Fibre lasers are used to apply large and complex text, data and graphics to products and thereby to enhance or complete the product by adding branding and other identifying information.

# LASER MARKING AND CODING

Our Lasers marking allow for cost effective marking solutions with excellent results and ensure maximum operating efficiency in the long run. Our Fiber Lasers and CO2 Lasers are able to handle almost every type of marking application for numerous different materials. Lasers are low maintenance, consume minimal power and easy to operate. Both reliable and efficient, a permanent and versatile way to marks.
