

PD-100 Series, the best choice for low cash flow environments.

PD-100 Series is the smartest and most humanized multicurrency detector which identifies automatically inserted banknotes of different currencies and detects all fake notes efficiently. The unique streamline design makes it be exquisite and artistic.

PD-100 Series, the single feeding detector, comes with magnetic, infrared and color sensors which automatically identifies and detects denomination of currencies. It memories accepted quantity and total amount in one step and provides outstanding notes detecting performance to reduce counterfeit losses. With the battery powered and lightweight design, PD-100 Series gives a flexible working capacity. For indoor usage, this smallest single feeding detector saves more space on your working area.

## PD-100 Series Technical Specifications:

<b>Feed-out Method</b>	Roller Type, Motorized
<b>Counterfeit Detection</b>	IR, MG, Color
<b>Counting Speed</b>	2 notes/sec.
<b>Bill Insert Direction</b>	4 Orientations
<b>Max Currencies</b>	12
<b>Max. Note Size</b>	185 x 82 x 0.5 (mm)
<b>Display</b>	2.8 Inch Graphic LCD with Backlight
<b>Power Supply</b>	100-240V, 50/60Hz. 4 AA Batteries
<b>Power Consumption</b>	Max. 10W
<b>Dimensions(mm)</b>	135 (W) x 133 (D) x 89 (H)
<b>Weight</b>	750 g without Batteries
<b>Interface</b>	PC Connection Interface (USB) Printer Interface
<b>Optional Accessory</b>	Thermal Printer
<b>Available Currencies</b>	Please contact MA or a MA authorized dealer.
<b>Approvals</b>	CE / FCC / ROHS

Easy opening cover for paper jam removal.

4 AA batteries, can process banknotes anywhere.
