pipetool technologies at work

Over 60 Years of Global Innovation

ROTHENBERGER ROMAX PRESS TECHNOLOGY

ROMAX® Press Machines – Made in Germany

For the bonding of pipes, ROTHENBERGER has developed a high-quality press technology system. Thanks to a platform strategy with high component similarity, the tools win over customers with their technology and safety. ROTHENBERGER pressing tools are developed and manufactured in Germany.

ROTHENBERGER Pressing Technology Overview

	Compact	3000
Nominal size	For press connections of Ø 15 - 40 mm - Overview below	For press connections of Ø 15 - 100 mm* - Overview below *Capable of pressing up to Ø 110 mm but dependent on the availability of a fitting system and approved jaws

Press Jaw & Pipe System Overview

Label Colour	Pipe system	Romax unit	Jaw sizes available
Green	B-Press	Compact	15 - 20 - 25mm
		3000	15 - 20 - 25 - 32 - 40 - 50 - 65 - 80 - 100mm
Yellow	Duopex	Compact	16 - 20 - 26 - 32 - 40mm
		3000	16 - 20 - 26 - 32 - 40 - 50 - 63mm
Blue	Auspex	Compact	16 - 20 - 25mm
		3000	16 - 20 - 25mm

Note: Press jaws are not interchangeable between the Romax Compact and Romax 3000 Systems

ROTHENBERGER Constant Force Technology

The CFT® technology guarantees a constant axial pressing force over the entire service interval. A very important requirement for the production of sealed press connections CFT® guarantees:

ROMAX® Compact
19-21 kN for 10,000 press cycles

ROMAX® 3000
32-34 kN for 20,000 press cycles

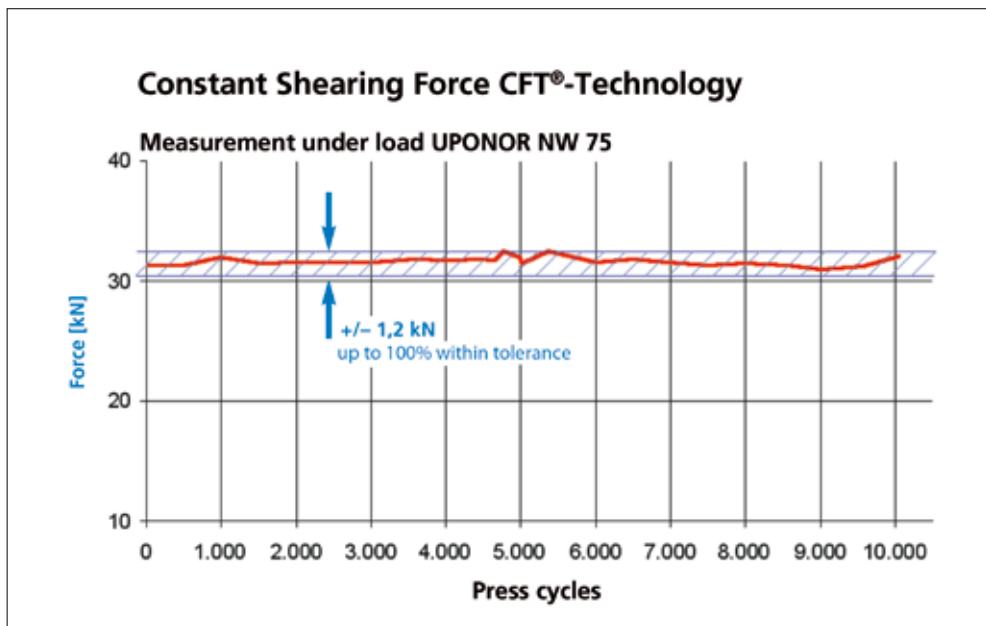

Safety lock

No accidental release, since a 180° rotation is required

Safe operation with the emergency-stop switch

All ROTHENBERGER press machines are equipped with an easily accessible emergency stop switch. By pushing the switch, the press cycle is immediately interrupted and the piston retracts automatically.

Controlled press cycle

After reaching a predetermined pressing force the press cycle switches off automatically. The piston retracts after the necessary pressing forces has been reached. This guarantees uniform and reliable pressings analogue to the requirement of leading system manufacturers.

Electronic control

The electronics of the ROMAX® Compact and the ROMAX® 3000 provide for a safe pressing cycle:

- Control of the battery charge status
- Safety start-inhibitor when the battery is too low
- LED display of the service interval and any error messages

ROTHENBERGER Li-Ion Technology

The pressing tools ROMAX® Compact and ROMAX® 3000 are equipped with the newest Li-ion technology. Li-ion batteries have many advantages compared to standard battery technology:

- High energy density - up to 100% more pressing per charge compared to the ROTHENBERGER NiMH battery
- Low weight - 30% weight savings
- Cold-resistant - even at near freezing temperatures
- Lowest self-discharge - can be stored up to 12 months
- No memory effect - can be charged at any time
- Constant energy from the first until the last pressing

ROMAX

PRESS TOOLS

ROMAX® Compact

Electro-hydraulic press machine, for battery and mains operation for the pressing of fittings up to Ø 40 mm (plastic/multi-layer) and/or up to Ø 25 mm (metal) with 19 kN

Made in Germany

Product Profile

APPLICATION AREA

The ROMAX® Compact is extremely light, easy to hold and with its compact design it is perfect for field use, especially in confined spaces

KEY FEATURES

- Extremely light: only 2.6 kg
- Ergonomic thanks to the rubberised handle and balanced weight distribution
- For battery and mains operation
- Work-bench function
- Controlled press cycle
- Electric control with service counter and battery status indicator
- CFT®-Technology
- Safety lock
- Emergency stop switch

TECHNICAL DATA

Dimension:	400 x 70 x 90 mm
Weight:	ca. 2.6 kg (without press jaw)
Piston force / hub:	19 kN / 30 mm
Nominal size:	Ø 15 - 40 mm (System dependent)
Press jaw fixture:	270° rotation
Power supply:	Li-ion battery 14.4 V / 2.6 Ah
Operating temperature:	0° C up to +40° C
Pressings:	up to 140 with 28 mm stainless steel

PRESSING TOOLS

Press jaws: ROTHENBERGER Compact press jaws

Light weight and balanced weight distribution

Fatigue-free and ergonomic use even over long periods of time

LED display

Electronic battery charge indicator, electronic counting of the press cycles (Display when service interval has been reached, further pressings are possible)

Powerful motor

Fast pressings in approx. 4 seconds

Wand-like

design enables use in installation shafts and by front-wall constructions

270° rotatable jaw fixture

For easy use in confined spaces

Safety lock

No unintentional opening because a 180° rotation is necessary

Rubberised handle

Secure hold even in wet conditions

Emergency stop switch

Immediate interruption of the feed and retraction of the piston

CFT®-Technology (Constant Force-Technology) for a constant axial force of 19 kN

Constant pressing force for over 10,000 press cycles

Li-ion battery technology

Up to 100% more pressings*

* compared to ROTHENBERGER NiMH batteries

ROMAX PRESS TOOLS

ROMAX® Compact Set

(No. 1000000184) includes: ROMAX® Compact press machine, 1x 14.4 V/2.6 Ah Li-ion battery (No. 15418), rapid charger (No. 1500000230), 3 x B-Press jaws (15, 20 & 25mm) in a plastic carrying case

Made in Germany

All ROMAX® Compact have a Li-ion battery!

High energy density

More pressing per charge, light weight ²⁾

Cold-resistant

Can be used in even the lowest temperatures (-10° C up to + 60° C)

No memory effect

A partially discharged battery can be fully recharged without any loss of capacity

Low self discharge

Very long shelf-life

Workbench function with stable supporting surface

Slim – compact wand-like design

Work above head

Model	Description	Press jaws mm	kg	No.
ROMAX® Compact Set	Romax Compact tool, Charger, 14.4V Li-ion battery, 3 x B-Press Jaws in a plastic carry case	15, 20 & 25mm	5.0	1000000184
ROMAX® Compact	Romax Compact tool, Charger, 14.4 Li-ion battery in a plastic carry case	No Pressing Jaws	2.65	1000000161

ACCESSORIES

Model	No.
ROMAX® Compact spare battery (14.4 V / 2.6 Ah, Li-ion)	15418
ROMAX® Compact charger (230 V)	1500000230
Plastic carrying case for up to 6 B-Press Jaws (Case only)	15031

ROMAX

PRESS TOOLS

ROMAX® 3000

Electro-hydraulic press machine for battery and mains operation for the system dependant pressing of fittings up to Ø110 mm* with 32 - 34 kN

Made in Germany

Product Profile

APPLICATION RANGE

The ROMAX® 3000 is fast, light, handy and safe. It is ideally suited for use at the building site

KEY FEATURES

- **Fast**
A pressing cycle only last approx. 5 seconds. The piston retracts automatically after every finished pressing
- **Safe**
CFT® guarantees the necessary pressing force. The automatic controlled press cycles ensures that the piston retracts to the starting position after the necessary pressing force has been reached
- **Light**
The extremely low weight, as well as the balanced weight distribution, ensure fatigue-free use even in continuous use

*Dependent on the availability of a system with that size fitting and a press jaw engineered to match that system.

KEY FEATURES

- **Reliable & economical**
Thank the highest quality service interval of 20,000 pressing cycles. This secures continuous economical use
- **Expanded operational temperature range**
The ROMAX® 3000 works perfectly even under adverse environmental conditions. Pressing is possible between -10° C and +60° C
- **Large range**
The standard Li-ion technology allows up to 160 pressings (with 28 mm stainless steel), and/or 90 pressings (with 54 mm stainless steel) with each charge
- **Practical design**
The compact, wand-like design allows pressings even in confined spaces

3 Years Warranty
12 months for batteries

Wand-like

Design allows use in installation shafts and by front-wall constructions

Rubberised handle

Secure hold even in wet conditions

2-speed switch

Light pressure activates the LED, when pressed through the pressing cycle begins

LED display

Electronic flat battery detection, electronic counting of press cycles (Notify maintenance interval), further pressings possible

Safety lock

No unintentional opening because a 180° rotation is required

Press jaw fixture can be rotated 270°

For easy operation even in confined spaces

Light weight and balanced weight distribution

Fatigue-free and ergonomic use even over long periods of time

Powerful motor

Fast pressings in approx. 5 seconds

Emergency stop switch

Immediate interruption of the feed and retraction of the piston

CFT®- Technology (Constant Force-Technology) for constant axial pressing force of 32 kN

Constant pressing force over 20,000 press cycles

ROMAX PRESS TOOLS

ROMAX® 3000 Set Basic I

Set Basic I (No. 15020) includes: ROMAX® 3000 press machine, 1x 14.4 V/2.6 Ah Li-ion battery (No. 15810), rapid charger (No. 150000231), plastic carrying case (No. 15016), (without press jaws)

Made in Germany

TECHNICAL DATA	
Dimensions:	445 x 125 x 75 mm
Weight:	approx. 3.6 kg (without press jaws)
Piston force/-hub:	32 kN / 40 mm
Nominal size:	Ø 15 - 50 mm (system dependant)
Press jaw fixture:	270° rotation
Power supply:	Li-ion battery 18 V / 3 Ah
Operating temperature:	-10° C up to +60° C
Pressings:	Up to 160 with 28 mm stainless steel Up to 90 with 54 mm stainless steel
PRESSING TOOLS	
Press jaws:	ROTHENBERGER standard press jaws, compatible with many other manufacturers starting on page 69

Compact Press Jaws

For ROMAX® Compact

ROTHENBERGER Press Jaws with proven material and manufacturing quality for system dependant pressing of fittings up to 25 mm (B Press), Ø 32 mm (Auspex) and / or up to Ø 40 mm (Duopex)

Special hardening process

High degree of elastic force and expansion capability

3-bolt synchronised mechanism

- Highest precision by pressing
- Synchronised run of the jaw lever
- Increased stability and durability
- Open the jaw with just 1 finger!

Batch numbering and individual testing

Secures the high quality standard of material and press contour

Product identification, simple to read, clear system and nominal size classification

Precision-manufactured contours

For optimum and reliable pressings

Made of forged, highly resilient special steel

Suitable for all press machines with a constant axial thrust of **19 kN** and compatible press jaw fixture

Permanent bolt

- Without potential weak points / no thread
- Considerable reduction of the breakage risk
- Increased safety

Long-term corrosion protection

Optimum for heavy-duty field operation

Optimised inlet contour

- Adapted power flow
- Less wear and tear

3000 Press Jaws

For ROMAX® 3000

ROTHENBERGER Press Jaws with proven material and manufacturing quality, for system conforming pressing of fittings up to 50 mm (B Press), Ø 32 mm (Auspex) and / or up to Ø 40 mm (Duopex)

Special hardening process

High degree of elastic force and expansion capability

3-bolt synchronised mechanism

- Highest precision by pressing
- Synchronised run of the jaw lever
- Increased stability and durability
- Open the jaw with just 1 finger!

Batch numbering and individual testing

Secures the high quality standard of material and press contour

Product identification, simple to read, clear system and nominal size classification

Precision-manufactured contours

For optimum and reliable pressings

Made of forged, highly resilient special steel

Suitable for all press machines with a constant axial thrust of **32 - 34 kN** and compatible press jaw fixture

Permanent bolt

- Without potential weak points / no thread
- Considerable reduction of the breakage risk
- Increased safety

Long-term Corrosion protection

Optimum for heavy-duty field operation

Optimised inlet contour

- Adapted power flow
- Less wear and tear

XL Press Jaws

For ROMAX® Press Tools

ROTHENBERGER XL Press Jaws with proven material and manufacturing quality for system dependant pressing of fittings of 65, 80 & 100 mm (B Press)

Precision-manufactured contours
For optimum and reliable pressings

Made of forged, highly resilient special steel
Suitable for all press machines with a constant axial thrust of **32 - 34 kN** and compatible press jaw fixture

Special hardening process
High degree of elastic force and expansion capability

2-bolt synchronised mechanism

- Highest precision by pressing
- Synchronised run of the jaw lever
- Increased stability and durability
- Open the jaw with just 1 finger!

Batch numbering and individual testing
Secures the high quality standard of material and press contour

Compact Design
Crimp fittings in confined spaces

Permanent bolt

- Without potential weak points / no thread
- Considerable reduction of the breakage risk
- Increased safety

Long-term corrosion protection
Optimum for heavy-duty field operation

Optimised inlet contour

- Adapted power flow
- Less wear and tear

Actuator

For ROMAX® Press Tools

ROTHENBERGER Press Jaws with proven material and manufacturing quality, for system conforming pressing of fittings 65, 80 & 100 mm (B Press)

Precision-manufactured contours
For optimum and reliable pressings

Made of forged, highly resilient special steel
Suitable for all press machines with a constant axial thrust of **32 - 34 kN** and compatible press jaw fixture

Special hardening process
High degree of elastic force and expansion capability

3-bolt synchronised mechanism

- Highest precision by pressing
- Synchronised run of the jaw lever
- Increased stability and durability
- Open the jaw with just 1 finger!
