LASER PROCESS CUSTOMIZATION

THINKLASER USA

Thinklaser USA manufactures custom laser solution, refurbishment of GSI Lumonics and Lumonics wafermarking system.

3M

3M™ Novec™ Engineered Fluids are versatile, non-flammable fluids used in various critical industrial applications. With excellent dielectric properties and a wide range of boiling points, these fluids have excellent materials compatibility and thermal stability.

PRIMA POWER LASERDYNE

Laser processing tools for cutting, drilling and welding specialize materials.

LT BIMETALLIC ENGINEERING

LT Bimetallic manufactures a remarkable range of impeccable quality products from screw shafts, barrels and accessories for plastic extrusion and injection molding, precision engineering works to heat treatment and hard chroming.

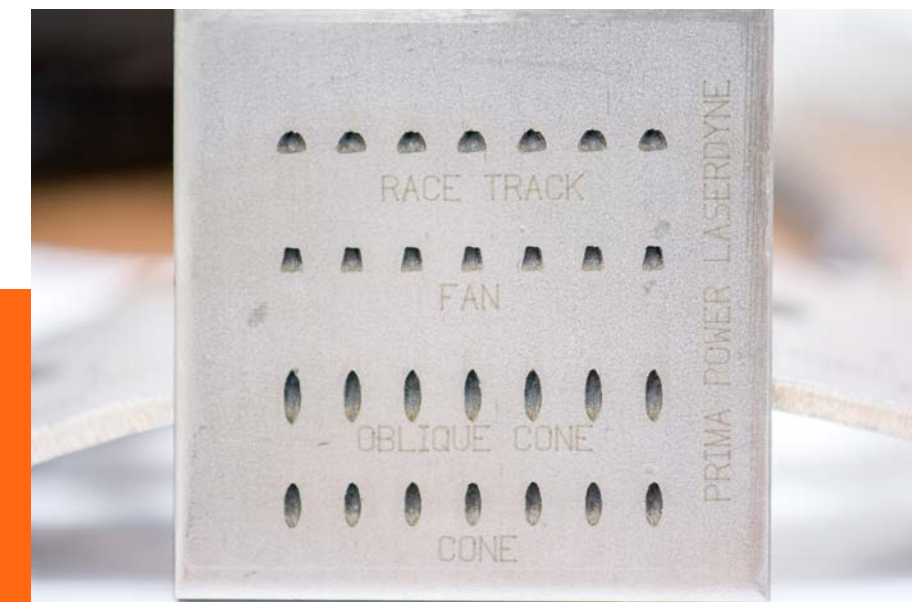

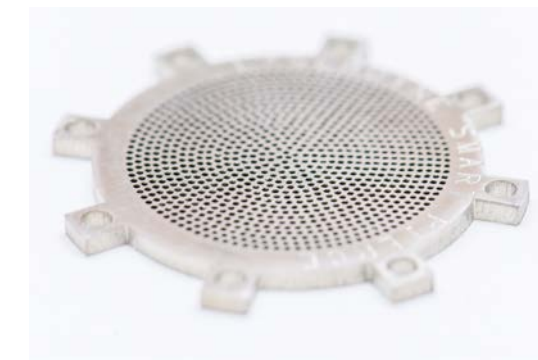

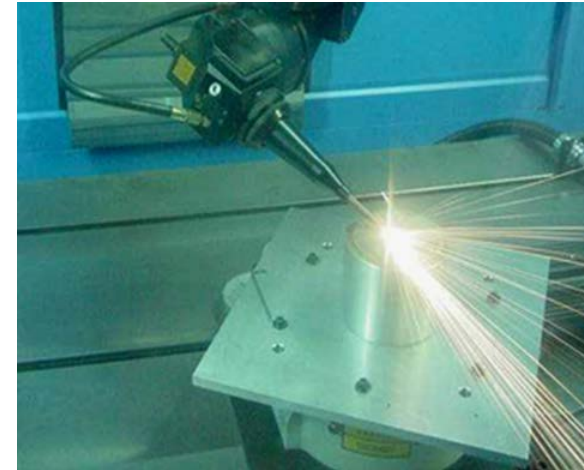

FUCHS

Fuchs is a German lubricant specialist, providing a full range of metal finishing, hydraulic, gear, engine, compressor and wire rope lubricants.
