PRODUCT RANGE

CAPABILITIES & SOLUTIONS

Product and Project Consultation

We provide product and project consultation to better understand your requirements. This includes project calculation and technical consultation to establish on-time and seamless sanitary hardware integration that adheres to industry quality standards.

We offer customization of water sanitation hardware products to achieve specific needs and conform to industry requirements for water systems. Equipped with the capacity to accommodate PPVC projects in overseas casting facilities, we have the ability to support civil works and building construction developments in Singapore and within the region.

To facilitate our clients' projects, we also provide Bill of Quantities and Schedule of Rates in water and sanitary in the building and construction industry.

On-site Support

For a total water hardware solution, our engineers and technicians work together with reliable partner companies for on-site installation and setup. Upon system implementation, clients can be assured of reliability in continued hardware support for warranty and maintenance of products.

Product Logistic Management

To support project productivity and cost efficiency, our service extends to product logistic management, ranging from warehouse storage, local delivery, packing, to overseas delivery. With our extensive delivery fleet and warehousing infrastructure, we can ensure timely and accurate distribution of water and sanitary hardware supplies for your projects.

ABOUT LIANG CHEW

With a history of over 30 years as a sanitary and water hardware distributor, Liang Chew Hardware is dedicated to provide products that are capable of exceeding customers' needs and expectations.

Liang Chew Hardware Pte Ltd was incorporated in 1983. With a history of over 30 years, the company boasts a long-standing reputation as Singapore's established sanitary hardware distributor.

The company has a portfolio of highly regarded international suppliers such as Japanese Sekisui, Australian MM Kembla and China's ERA. These brands are market leaders in their respective expertise by the industry. Together with their in-house brand Norika, Liang Chew Hardware offers a wide range of products for sanitary, water and irrigation and

swimming pools which are widely used in local residential and commercial projects which include hospitals.

Through its in-house developed products, Liang Chew Hardware constantly seeks to improve by thriving to keep pace with the changing markets and consumer requirements. The company also strives to improve productivity by developing its products to minimize installation efforts.

The leading water hardware solution provider in the plumbing industry
