To Whom It May Concern

Hawker Pacific Pty Ltd provides full aircraft heavy maintenance engineering and refurbishment facilities based at Perth Airport.

Hawkers Pacific are also the Raytheon authorized service centre for West Australia and provide aircraft sales and services to international and local companies.

Hawker Pacific uses the services of Ultra Shine Aviation on our client's aircraft for the past 18 years. We use Ultra Shine Aviation's Pro-seal paint Sealant to restore and present our clients aircraft, back to them in the best possible condition.

The Paint sealant process provides a high durable gloss and extends the paint life, in most cases saves our client having to repaint their aircraft. Our customers are very surprised as to there aircraft presentation and on going maintenance program Ultra Shine Aviation has in place to protect there investment. We also utilize Ultra Shine Aviation's interior cabin services, leather treatments and upholstery dry-cleaning.

Ultra Shine Aviation also provides window restoration to remove stone and crazing damage on pressurized aircraft.

We find the company and it's accompanied process to be most effective and would recommend their services and products.

Yours Sincerely,

Clay Baxter
Chief Engineer – W.A.
Hawker Pacific Pty Ltd.
