To Whom It May Concern

Skywest Airlines, a leader in aviation with International and local RPT, Mining Charter, and Executive Charter, operate a fleet of Fokker F100 and F50 aircraft based at Perth Airport Western Australia.

Skywest Airlines and Ultra shine Aviation have been working together since 1980, (27 years) during this time Ultra Shine Aviation have provided various services such as exterior washing of our aircraft on a weekly bases and interior cleaning nightly. They also maintain the interior soft furnishings and polishing of the exteriors.

Currently our paint surfaces are being sealed with Ultra Shine Aviation Pro-seal paint sealant. The Paint sealant process provides a high gloss and easy removal of carbon build up from painted surfaces adjacent to the engine exhaust. The process also gives improved corrosion and contamination protection and simplifies cleaning.

We find the sealant and its accompanied process to be cost effective, and it allowed us to extend our repaint program appreciably.

Also as Ultra Shine Aviation has a CASA Approval this gives added comfort that the work performed is to a very high safety standard, as all our suppliers must have aviation approvals

We are more than satisfied with the process, products and the quality of work and recommend all services provided by Ultra Shine Aviation.

Yours Sincerely,

G Windsor
Engineering Project Manager.
